To Whom It May Concern,

I have been working with AC General Contracting Inc. for my home improvement needs since 2005. The first job was to paint our large three story home. When we decided to sell the condominium unit on the first floor, after renting it for 19 years, we called AC General Contracting Inc. again. They gutted the bathroom, updated kitchen, painted throughout, and replaced floors. The unit sold within 24 hours for 10% more than the realtors suggested. We then hired them for a complete kitchen and bathroom rehab in our home.

More recently, we had another bathroom rehab, updated plumbing and electrical, installed hardwood floors, replaced a roof and rebuild a 3rd floor deck overlooking the backyard patio. Once again, the house needs painting and I have asked them to do this project.

I personally think the Miguel, as well as the supervisors, the crew, and the whole company is consistently skilled, friendly and hard working. They deliver high quality workmanship at reasonable prices in reasonable time frames. At least a half dozen times, neighbors have asked for their contact after seeing results of our projects. As a long term satisfied customer, I'm happy to recommend them to anyone for large and small home improvements.

Sincerely,

Pamela Moore

Dear Miguel, Gary, Fernando, Mauricio and crew,

Thank you very much for the fabulous job you did on our 12 Andersen 400 windows that were installed this summer and fall. They are lovely and the staining that Mauricio did was great! Fernando was also a great help. Never break up your team.

We'll be in touch in the spring when we start replacing windows on the 2nd floor of the house. No staining as the replacements will be all white but maybe Mauricio and Fernando can come by and say hello. My 2-year old grandson now thinks that every window specialist is named Fernando.

Wishing you a Happy Thanksgiving, I am

Yours truly,

Linda N. Oates

Hi Miguel and Gary,

I just received this from Appleton Kitchen for our counter top in our breakfast room. I hope you are well. And, for the record, we are forever grateful for the work you did on our house.

Thank you,

Susan Markowitz

IR Hands-On-Training Review

With

AC Solar LLC

As a review and input from our “Hands-On-Training” event held on 11-10-12 in Woburn MA. This review is intended to capture some of the high points I noted during the event and share them with you for thoughts to carry with you into your next solar projects and also to encourage you to reflect and possibly share back with me as to items you see that IR can improve our products and or training events.

First I would like to share with all the workers at AC Solar, what an un-believable team you are. Everyone on your team works as a team player with one goal in mind, to work as a team and get the job completed. I don't see that in many companies that I train with and this alone will set you above other solar installing teams in the industry.

About 3/4 of the training day was gone, and one of you came up to me and asked how installers ever get to the point of being able to complete more than one job or project per day. That he had heard that installers were installing 2 or maybe even 3 jobs in one day.

From that I would like to share that I have had the opportunity to work with some of the biggest mega installers in the nation. And in their teams of installers they are running 4 to 5 men in an install team for an average 4 to 5 KW res. Install. These teams are installing one or two sites a day, and only on the most perfect days with the most perfect sites on single story structures.

You will get to that point of being able to install more than one site a day with perfect site conditions. On the training day we were over crowded on the roof all trying to learn and see. We were working on a two story roof.

I hope these notes help! Be safe! I'm always here to support you.

Thank You.
